HOT TUB INSTALLATION GUIDE

To ensure the safe and effective use of your hot tub and heat exchanger, please follow the instructions below:

Placement: Position the hot tub and heat exchanger on a level, solid surface. Proper alignment will ensure the heat exchanger's inlet and outlet match the tub's connections precisely.

Connection: Use the provided quick connector fittings to attach the heat exchanger to the hot tub. Place the drip pan directly beneath the heat coil to catch any residue or water.

Covering the Coil: Secure the protective cover over the heat exchanger coil before proceeding further.

Filling the Tub: Fill the tub with water to your desired level. It is important that the water level remains above the warm water inlet at all times to ensure proper circulation and heating efficiency.

Starting the Fire: Open the lid of the heat exchanger and ignite a small fire using kindling. Once the initial fire is established, gradually add larger logs to maintain a steady flame.

Heating Time: The water can be heated to a temperature range of 17°C to 35°C within approximately 2 to 3 hours, using three bags of firewood and maintaining a consistent fire.

Securing the Lid: After adding firewood, close the heat exchanger lid using the lid hook provided with the unit to ensure safe operation.

Important Safety Information

- **Outdoor Use Only:** This product is designed for use in well-ventilated outdoor areas only.
- **Heat Caution:** The heat exchanger and connecting hoses can become extremely hot during operation. Exercise caution, especially around children.
- **Child Safety:** Never leave children unattended near the hot tub or heat exchanger.
- **Cleaning Instructions:** Clean the interior of the hot tub using a soft brush or cloth. Avoid hard brushes or abrasive materials, as these can damage the protective powder coating.
- **Fire Safety:** Never leave the fire inside the heat exchanger unattended at any time.

Please ensure all installation and safety guidelines are followed carefully to enjoy a safe and pleasant hot tub experience.
