

KOI POND INSTALLATION GUIDE

KOI POND INSTALLATION GUIDE

- Ensure that the Koi Pond is placed on a solid level surface with the inlet and outlet pointing towards the filter or pump.
- Connect the filter or pump to the inlet and outlet using sufficient thread seal tape, do not overtighten.
- Fill the Koi Pond to the desired level, always keeping the water level higher than the water inlet level.

PLEASE ENSURE THAT:

- Take caution with children around the koi pond.
- Clean the inside with a soft brush or cloth, not with hard brooms or objects that will damage the powder coating.
